

Smart gates for smarter living

A BRAND OF SOMFY GROUP

Be ahead

Take control of your gate automation

An automatic gate system is the first step to making life at home more convenient and secure. Adding a touch of connectivity, opens up a world of possibilities.

Gates powered by BFT Automation can be equipped with Wi-Fi or GSM smartphone control. Once connected, your automated gate system gains access to a wide range of advanced features and support services. These include smartphone operation, voice control, and system monitoring* with fault detection - all part of a comprehensive smart connected solution.

The Somfy TaHoma app enables seamless connection to your BFT automated gate system, giving you smart, intuitive control at your fingertips. With a simple setup and registration process, you can easily link your smartphone to the system and take full advantage of a comprehensive connected gate solution.

Compatible with:

* BFT installers require permission to engage remote servicing

Smart control

Modern smartphones are more than just phones—they're powerful, pocket-sized computers that keep us connected, organised, entertained, and informed all day long. So why wouldn't you want to control your automatic gates with yours?

Home and away

Wouldn't it be ideal to keep your home secure with closed gates, yet still open them for important deliveries or invited guests? Whether you're at home, work or on the go, the Somfy TaHoma app gives you full control to operate your gates whenever needed.

Real time status

Somfy TaHoma lets you check the real-time status of your gates, so if you've rushed out to work and forgotten to close them, it's no problem—just open the app to view their status and close them remotely if needed.

“OK google, open the gate”

Link your smart device to effortlessly open your automated gates from your car using a voice command. Stay warm and comfortable without stepping outside - perfect for winter days.

Your connected gate-system

Smart control and remote services from your BFT installer.

Smart control isn't the only benefit with a BFT connected gate system. Your installer can provide after-sales service quicker and easier with the remote intervention functionality. With your authorisation, your installer can view faults and potentially resolve issues by accessing your gate system remotely. Remote controls can also be deleted remotely or replaced and posted to you.

WAYS TO CONTROL

TaHoma app

The TaHoma app is your simple interface for controlling your gate automation, at any time and from anywhere, whether you are at home or away. You can also check the realtime open/closed status of your gates.

Voice control

Voice control compatible through TaHoma: you can use Amazon Alexa or Google Home. Just ask and it is done!

Widget control

Add a TaHoma control widget to your phone home screen for instant gate control. No need to open the app, just operate your gates directly from the home screen widget!

Remote control

Remote controls, wall switches, keypads and intercom stations are also available to control your automatic gates.

REMOTE SERVICES

Fault diagnostic

In the unlikely event a fault develops on your gate system, your BFT installer can remotely* check the system status and start diagnosing the issue.

Remote adjustments

Certain system settings can be adjusted such as the gate motor speed or the command a specific button on a remote control provides. And with remote access*, your BFT installer can make these changes in an instant.

Control management

If a remote control is lost or needs to be deleted, your BFT installer can handle it remotely* keeping your system secure. A new remote can be sent directly to you, ready to use right out of the box.

Intervention control

Remote servicing is only possible with your permission. When needed, your BFT installer will send a remote access request by email. Once approved, access is granted for a maximum of 8 hours - always keeping you fully in control of your system.

* BFT installers require permission to engage remote servicing

A connected solution for peace of mind

Convenience

With a connected solution, your gate automation is easier to control, with real time open/closed status available to view in the app. A family of smartphone users can conveniently control the gates at the touch of a button or with a voice command.

Reliability

Choosing BFT and Somfy means choosing a long-term solution that is easy to use and works reliably. You have the comfort of knowing that if anything ever does go wrong, you can count on efficient service. Your BFT installer can troubleshoot issues remotely*, offering you a quicker, seamless and more convenient service.

Security

With a connected gate system, you always know if the gates are open or closed. If the gate has been left open, then a quick close command can be carried out wherever you are. The TaHoma app also records the history of operation.

* BFT installers require permission to engage remote servicing

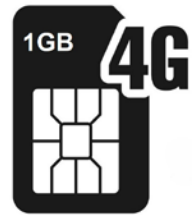

Wifi or mobile we've got you covered

Setting up your BFT automated gates for smart control is quick and easy. A compact plug-in module - available in either Wi-Fi or GSM format - is installed directly into the gate's control panel to enable connectivity. Once fitted and activated, you're ready to connect and take full control from your smartphone.

Wifi Signal

Wi-Fi modules are ideal when the control panel is within range of your home's Wi-Fi signal.

GSM Mobiel Signal

Perfect for projects in areas with no Wi-Fi access, this GSM module comes with a 1GB SIM card.

Your BFT installer will assess your gate automation requirements to recommend the most suitable signal module option.

After your gate system is installed, commissioned, and tested, you will receive an email from your BFT installer with an invitation to download the Somfy TaHoma app:

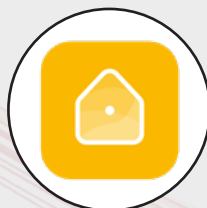

* Requires a voice assistant

1 EMAIL INVITE

Your BFT installer will send you an email inviting you to download the Somfy TaHoma app

2 TAHOMA APP

Download and register the free Somfy TaHoma app

3 ADD YOUR GATE SYSTEM

Follow the simple steps to add your gate system to the TaHoma app

4 SMART CONTROL

Control your gates with the TaHoma app and link to your smart device to enable voice activation*

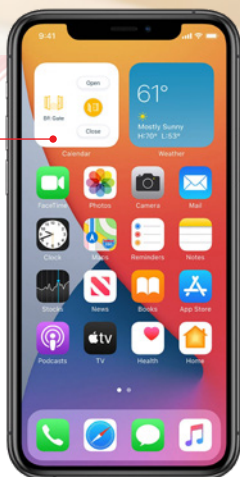

Ensure your BFT gate system is enabled for connectivity.

To enjoy all the benefits of a connected smart gate system, ensure your BFT installer enables your automated gate system to allow connectivity to smart devices.

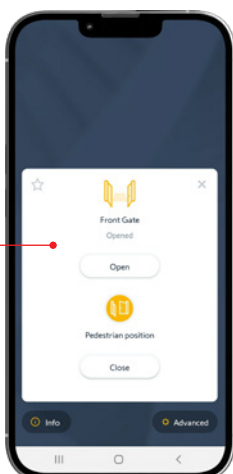

Add a gate control widget to your phone home screen

Control your gates anytime & anywhere

View the current status of your gates

+ Control your connected gates

- From the TaHoma app
- While home or away
- Using a voice command*

+ Get real-time information on the status of your gates

- The TaHoma app indicates if the gates are open or closed

+ Control for all the family

- All family members can use the TaHoma app to control the gates

+ Widget control

- Use the TaHoma widget to operate your gates without opening the app

* Requires a voice assistant
